

2018 ANNUAL REPORT

SIG/Committee Name: Response Shift SIG

Date: March 14, 2018

Co-Chairs: Veronique Sebille, Tolulope Sajobi, PhD

Board Liaison: Antoine Regnault, PhD

Mission: The purpose of the response shift interest group is to bring together investigators and clinicians who are interested in the influence of response shift (a change in an individual's values, internal standards, and conceptualization of QOL) on QOL assessments. The ultimate objective is to better understand when and why response shift occurs such that healthcare professionals and researchers using patient reported outcomes across various disciplines can recognize and account for response shift.
