

Advancing Health Outcomes Research Methods and Clinical Applications

Table Contents

A Broad Look at Outcomes Research

1. Measuring Quality of Life for Policy Analysis: Past, Present, and Future 1
Robert M. Kaplan

Item Response Theory

2. Item Response Theory and Beyond: Advances in Patient-Reported Outcomes Measurement 37
Chih-Hung Chang
3. Assessing the Fit of IRT Models to Educational and Psychological Test Data:
A Five-Step Plan and Several Graphical Displays 57
Ronald K. Hambleton and Ning Han

Computerized Approaches to Qualitative Text Analysis

4. Assessing Quality of Life through Natural Language Use: Implications of Computerized Text Analysis 79
Cindy K. Chung and James W. Pennebaker
5. Automated Systems That Analyze Text and Discourse: QUAID, Coh-Metrix, and AutoTutor..... 95
Arthur C. Graesser and Sarah Petschonek

Longitudinal Data Analysis

6. A Latent Variable Growth Model Approach to Analyzing Multiple Health Outcomes from Clinical Trials..... 113
Max Su and Marcia A. Testa
7. GEE and Missing Data in Longitudinal Studies..... 139
Joseph W. Hogan
8. Missing Data: A Sensitivity Analysis..... 155
*Herbert Thijs, Geert Molenberghs, Ivy Jansen, Caroline Beunckens,
Michael G. Kenward, Craig Mallinckrodt, and Raymond J. Carroll*
9. Understanding the Correlation between Biologic and Symptom Measures over Time 177
Diane L. Fairclough and Xin Shelley Wang

Outcomes Research Applied

10. Regulatory Perspective on Outcomes Research 191
Robert J. Meyer
11. Interpreting the Results of Quality-of-Life Measures in Clinical Trials: The Clinician's Perspective..... 201
Holger J. Schünemann and Gordon H. Guyatt

Theoretical Issues in Research on Health Status, Quality of Life, and Well-Being

12. The Psychology of Quality of Life 213
M. Joseph Sirgy
13. Language and Culture: Moving between Theory and Practice in Cross-Cultural Research..... 231
Julia A. Fox-Rushby, Kirstin Johnson, Isaac Mwanzo, Mary Amuyunzu, Tim Allen, and Melissa Parker
14. Self-Regulatory Fit and Quality of Life..... 249
Karen L. Langsam, Antonio L. Freitas, and E. Tory Higgins
15. Measuring Health-Related Quality of Life: Does Prospect Theory Help? 265
Eve Wittenberg
16. Daily Process Designs: Applications to Quality-of-Life and Health Outcomes Research 281
Howard Tennen, Glenn Affleck, and Alex Zautra

Bayesian Methodology

17. Bayesian Analysis of Health Status and Quality-of-Life Data 305
Dennis G. Fryback and Janel E. Hanmer

Theoretical and Applied Aspects of Utility Measurement

18. Building a Better QALY: General Health-State Utility Measures 325
F. Reed Johnson
19. Software Tools for Quality-Adjusted Survival Analysis Using Q-TWiST 337
Bernard F. Cole, Shari Gelber, and Richard D. Gelber
20. Comparing and Contrasting Utilities and Willingness to Pay 353
David Feeny

Looking to the Future of Outcomes Research

21. Future Directions for HRQOL..... 369
Peter Fayers
