

## USA Executive Order Statement

The ISOQOL Annual Conference is periodically held in the United States. ISOQOL's Annual Conference is a place where influential leaders, outcomes researchers, patient research partners, surgeons, physiologists, psychometricians, nurses, new investigators, students and other medical professionals are welcome, and where the open flow of scientific information is paramount.

We are aware of the executive action by the U.S. presidential administration that would place restriction on the entry of residents from select countries. ISOQOL will continue to monitor events and will explore ways to support international attendees. We can provide an official letter of invitation to include with visa applications and provide documentation demonstrating the scientific nature of the Annual Conference.

When facing situations that threaten to interrupt our scientific pursuits, we must strengthen our resolve to work together to improve the quality of life for all people. The well-being of the world's population and scientific progress both depend on our continued collaboration and communication. Global gatherings such as the Annual Conference are needed now more than ever.
